## BTAC

The BTAC<sup>®</sup> [Basic Tilt Chair] features a system that tilts from 0° to a full 45°. This tilt range is not dependent on the frames position in space, allowing the widest range of tilt compared to any chair in its category. The BTAC<sup>®</sup> also allows the back angle to be set between 90° and 110° to accommodate a variety of clients. The seat depth adjustment of 16" to 18" makes fine-tuning of the chair simple. The combination of 3/4" round frame tubing plus the lowered cross members allows easy mounting of after market seating systems and drop seat assemblies.

**Standard On BTAC<sup>®</sup>:**

- 45° tilt mechanism
- 20° back angle adjustments
- Solid seat
- Seat widths from 14" to 20"
- Adjustable seat depths from 16" to 18"
- Back heights of 18" or 22"
- Rigid contoured back
- Adjustable height desk armrests with flat pads
- Multi-mount casters
- 24" x 1 1/4" mag pneumatic rear wheels with 21" hand rims
- Three rear wheel lock positions

## Manual Wheelchairs

- 8" solid front casters
- 20° or 90° fixed angle footrests
- Oversize footplates
- Flat cast pads and rigid mounts
- Adjustable height spreader bar
- Toggle brakes
- Dual trigger brakes
- Anti-tippers
- Frame colors: black, blue, teal, yellow, lavender, pink, white, silver or red
- Upholstery colors: black, gray, blue, red or burgundy

Basic Tilt Chair

The MRC™ (Manual Recline Chair) is designed to support the client needing to recline for pressure relief or position change. The standard MRC™ features our 105P (Reduced Shear Recliner) back and can be ordered or later upgraded with an AS8 (Adjustable Sliding Back) as shown below. The high strength frame plus the many standard features and available options, can support even the most involved clients.

#### Standard On MRC™

- Solid seat
- Seat widths from 14" to 20"
- Seat depths from 14" to 18"
- 950° (Reduced Shear Recliner)
- Back heights from 16" to 25"
- Rigid contoured back
- Low profile armrests with flat pads
- 70°-90° fixed angle footrest
- Flat cuff pads and rigid mounts
- Oversize footplates
- Tilt-in-mit rail

#### Manual Wheelchairs

- Wrap-around push handle
- Toggle brakes
- 20" mag pneumo-6C wheel assemblies
- 8" solid front casters
- Dual trigger releases
- Anti-spiers
- Contoured headrest that is height, depth and angle adjustable
- Frame colors: black, blue, teal, yellow, lavender, pink, white, silver or red
- Upholstery colors: black, gray, blue, red or burgundy

Manual Recline Chair

The MTC (Manual Tilt Chair) is the first to offer a full 50° tilt. The sturdy construction and many standard features like anti-tippers and dual trigger releases, make the MTC one of the safest, most durable tilt chairs available. The large selection of options and compatible accessories will suit the needs of most users without customizing an entire system. The 49° range of back angle adjustment is designed for ease of client positioning. Our Universal Seat Frame makes size adjustments and system upgrades simple and cost effective.

#### Standard On MTC

- 50° tilt mechanism
- 40° of back angle adjustment
- Solid seat
- Contoured Solid Back
- Back heights from 16° to 25°
- Adjustable Height Dual Arms
- Choice of full arm pad size
- Seat widths from 14" to 20"
- Adjustable seat depths from 14" to 18"
- 70° or 90° Fixed Angle Footrests
- Flair calf pads with rigid mounts
- Oversize footplates

#### Manual Wheelchairs

- Mid-Mount Rels
- 20" mag pneumatic wheel assemblies
- Tugger brakes
- B" solid front casters
- Wrap-around push handle
- Anti-tippers
- Contoured Headrest, height, depth and angle adjustable
- Dual trigger releases
- Choice of frame color: black, blue, teal, yellow, lavender, pink, white, silver or red
- Choice of upholstery color: black, gray, blue, red or burgundy

Manual Tilt & Recline Chair

The new ptc™ (Pediatric Tilt Chair) offers more versatility and standard features. Designed with a growing child in mind, the standard ptc™ offers an adjustable seat depth; plus the width can be easily and inexpensively modified. The sturdy aluminum frame and other light weight components allow a base weight of only 32 lbs. Combined with our standard fold-down back and height adjustable stroller handle, this chair can be easily handled and transported. The ptc™'s optional stroller handle offers a height and angle adjustable design for convenient

use, even in a tilted position. Lowered cross members allow after market seating to be added easily and with very few modifications.

#### Standard On ptc™

- Solid contoured back
- Aluminum base frame
- 45° tilt mechanism
- 20° back angle adjustment (90° to 110°)
- Seat widths from 10" to 16"
- Adjustable seat depths from 10" to 16"
- Back heights from 12" to 18"
- Fold-down back assembly

#### Manual Wheelchairs

- New, redesigned stroller handle
- Adjustable height desk arms
- Flat arm pads
- Toggle brakes
- 90° fixed angle laprests
- Anti-splints
- Dual trigger releases
- 6" solid front casters
- 12.5 mag pneumatic wheels
- Frame colors: black, blue, teal, yellow, lavender, pink, white, silver or red
- Upholstery colors: black, gray, blue, red or burgundy
