35	Speech-Lang	4%

Top Member States

81% belong to at least one SIG

21% belong to 2 or more

191 belong to none
816 belong to at least one SIG
92 belong to two
79 belong to three
44 belong to 4 or more

Special Interest Groups

Length of Membership

The “New” Members

About half of those who have joined since 2002 are women.

Is RESNA appealing to more women? Is it that more women are entering the AT field?

Credentialed Individuals

2700 ATP, ATS, and RETs

Only about 10% are members . . . why?

Credentialed Individuals

Five states mandate the ATS credential for reimbursement.

Can we replicate that requirement in other states?

Initial Observations

- RESNA has a core membership of about 800.
- The “core member” is dedicated to AT and has joined at least one SIG.
- Members are mostly East Coast (about half).

Initial Observations

- There is a large group of people who consider themselves professionals (credentialed), but have not chosen to join.
- “Newbees” — Almost half of the members have been with RESNA 5 years or less (still learning about the organization). Significant impact on communications.
