

**Jason Marsh, Director of Technology**

Jason Marsh is responsible for setting the technical direction of NextFlex, including managing Technical Council activities. Prior to joining NextFlex, Jason worked in Japan, India, Germany, Mexico, Malaysia and China, where he lived between 2003 and 2008, establishing greenfield factories for Kyocera. As Vice President at Insulectro, Jason focused on new materials and supply-chain strategies for the printed circuit board and flexible hybrid electronics industries, focusing on high reliability applications. Jason studied materials science and robotics at Stanford University, and worked on early versions of 3D printing using ceramics and metals, as well as developed instruments for physics experiments such as Gravity Probe B. He has served on advisory boards and consulted for companies in artificial intelligence, outdoor equipment, solar power, and agriculture.
