

John B. Maggiore

John Maggiore leads the Maintenance and Leasing Solutions organization within Boeing Digital Aviation. Boeing Maintenance and Leasing Solutions provide a broad portfolio of information and analytics-powered capabilities to the aviation industry. These solutions are used in both daily operations and long-term planning by hundreds of airlines, lessors and MROs around the world to help customers save money, improve efficiency and minimize disruptions. His organization also includes AerData, an industry leading digital records and leasing software and services business based in Amsterdam, which Boeing acquired in 2014.

In a previous role, John led the Airplane Health Management program, where he spent several years working on the concept, design and creation of Boeing's Airplane Health Management service. He joined the Boeing Company in 1986.

Maggiore's background includes 30 years in aviation with a strong focus on avionics, health management, digital transformation, and information management. Maggiore holds a bachelor of science in engineering from Louisiana Tech University, and has been awarded multiple patents for Boeing airplane data related information innovations.
