

Jon Allin

Dr. Jon Allin is a technology entrepreneur currently serving as the Chief Technology Officer at Permasense Limited, a high tech global business which designs, manufactures, sells and supports wireless monitoring systems. He drove the development of the first monitoring system and then led the creation of Permasense Ltd to deliver and support the system on a commercial scale. Dr. Allin combines deep knowledge of the various technologies that are used to make breakthrough monitoring systems a reality with the passionate conviction that such systems must deliver compelling business value and are designed for utter reliability in Oil & Gas environments, whilst also being cost effective for large-scale deployment. Dr. Allin served as a Director of Permasense Limited until acquired by Emerson Corporation. Dr. Allin holds a PhD from Imperial College London, from where the original Permasense technology was spun out.
