

Sreenivas Alampalli

Dr. Sreenivas Alampalli is the Director of the Structures Evaluation Services Bureau at the New York State Department of Transportation (NYSDOT). His responsibilities include managing structures inspection, evaluation, and safety assurance programs at the NYSDOT. He is a strong advocate of researchers, industry, and owners working together in developing and implementing innovative technologies to assure effective infrastructure management at reasonable costs. Dr. Alampalli is a Fellow of ASCE, ASNT, SEI, and ISHMII. He authored or co-authored more than 250 technical publications including a two-volume book on "Infrastructure Health in Civil Engineering" and books on Risk Management in Civil Infrastructure and Multihazard Considerations in Civil Infrastructure. Dr. Alampalli has been an active member of professional societies and currently chairs the TRB committee on Testing and Evaluation of Transportation Structures (AFF40). Among the awards he received include Bridge NDT Lifetime Service Award from ASNT, Government Civil Engineer of the Year Award from ASCE, ASNT Mentoring Award, and Charles Pankow Award for Innovation awarded by the Civil Engineering Research Foundation.
