

# The SUMO Speaker Series for Undergraduates

(food from Pizza Chicago)

Wednesday, November 11

4:15-5:05, room 380C

## Public-key Cryptography

Rebecca Bellare

Cryptography is the art of writing secret messages, but the magic of public-key cryptography lets us do far more than just send secret messages. I will talk about what public-key cryptography is and outline some applications, such as digital cash, which lets you spend money anonymously and untraceably online - the penalty for trying to spend the same coin twice is having your identity revealed!
