

energyStartup 2015 Summer Internship Position

Company Name: Keewi Labs, Palo Alto, CA

Description of position:

We are looking for an iOS Developer who possesses a passion for building great, easy to use mobile applications who will work with our hardware team to design and build Keewi's mobile applications. You will be working with a very experienced senior software engineer on a wide variety of aspects of the mobile app.

Keewi Labs is a clean energy startup working to make energy conservation convenient and affordable for consumers. We are currently operating on a grant from the Tomkat Center for Sustainable Energy's Innovation Transfer Grant program. Our team has a strong core of technical expertise and design experience, capable of offering technical training, and we are looking for candidates excited to help us make our mobile application as amazing as possible.

Who should apply:

A motivated developer looking to:

- Design and build applications for the iOS platform, focusing on great user experience.
- Collaborate with the rest of the Keewi team to define, design, and ship new features.
- Unit-test code for robustness, including edge cases, usability, and general reliability.
- Work on bug fixing and improving application performance.
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency.

Required expertise:

- Familiarity with, or a strong desire to learn Objective-C and Cocoa Touch
- Working knowledge of the general mobile landscape, architectures, trends, and emerging technologies
- Familiarity with client/server communications, experience with PHP a plus
- A current or soon-to-be student in a Bachelors or Masters of Science program

Preferred skills/Majors:

Internship term: 8 weeks

Compensation: \$6000
