

energyStartup 2015 Summer Internship Position

Company Name: Verdigris Technologies, Mountain View, CA - www.verdigris.co

Description of position:

Experience Design

We're looking for exceptional students in visual, interaction & product design. Our cross-discipline teams design energy intelligence products that are user-centric. You'll work closely with our design team as they research, prototype & iterate products alongside web, engineering & marketing teams.

Who should apply:

We look for designers that are highly empathetic, observant and quantitative, who work well with others, are highly self-motivated and love to solve meaningful human problems.

Required expertise:

A recent portfolio showing work across a variety of design specialities. Fluency in vector & wireframing software.

Preferred skills/Majors:

Design School, Arts or Computer Science

Internship term: 12 Weeks

Compensation: negotiable based on education and experience
