2015 Summer Internship Position

Company Name: WaterSmart Software, San Francisco, CA

Description of position:

WaterSmart Software, a fast growing technology startup based in San Francisco, develops customer engagement and water conservation SaaS solutions for water utilities. Lean, passionate, and mission driven, WaterSmart is a pioneer in the use of behavioral efficiency and data analytics for the water industry. Come join our team to help mitigate drought, preserve natural resources, and create greater economic security for the world.

Over the course of the months you will:

- Help the company scale by developing and executing an action plan to improve efficiency for a specific Client Services process.
- Analyze product usage patterns for current clients. Develop and potentially implement recommendations based on the analysis.
- Support Client Services staff with program implementation for a variety of new utility partners.
- Assess the potential impacts of decisions on colleagues' work, company growth, scalability, and customer satisfaction.

Who should apply:

Qualified applicants will have:

- The ability to diagnose complex problems and identify innovative solutions.
- A desire to “learn by doing” in a fun, fast-paced startup environment.
- A friendly, outgoing, flexible, and focused personality.
- Excellent written and verbal communication skills.
- The ability to work both independently and as part of a team.
- An interest in environmental issues and a passion for having a positive impact.

Required expertise:

- Strong quantitative analysis skills.
- Exceptional attention to detail.
- MS Office (Excel, PowerPoint, Word)

Preferred skills/Majors:

Classes in the following subjects are a plus: business, quantitative analysis, environment, policy, government

Internship term: 3 months (June - August)

Compensation: \$20/hour
