

## energyStartup 2015 Summer Internship Position

**Company Name:** WaterSmart Software, San Francisco, CA

### Description of position:

WaterSmart Software is changing the way people use water by bringing technology for behavior change to water users and analytic systems to water utilities. Our cloud-based platform tracks millions of water meters and helps end-users save water and money.

Our interns join a well-oiled engineering and operations machine that works at startup pace with the newest and best technologies.

Summer Internship Possibilities:

- Cloud-based elastic demand scaling and message-queue interaction
- Measurement and Verification of statistical water-efficiency programs
- Database interaction and design
- Front-end Web framework coding

### Who should apply:

If you are a CS, Engineering, or Statistics major with a background in coding, and like solving challenging technology problems, please apply.

### Required expertise:

Training in using computer software to solve challenging problems.

### Preferred skills/Majors:

Computer Science, Engineering, Statics or Math

**Internship term:** 8-12 weeks negotiable

**Compensation:** negotiable
