

ERRATA TO THE ARTICLE “AN INTRODUCTION TO KNOT FLOER HOMOLOGY”

CIPRIAN MANOLESCU

At the bottom of p.18: We should have $2n$ variables U_i instead of only n .

p.19, Equation (11): Instead of taking the product over $e_i \in \text{Out}(W) \cap \text{In}(W^c)$ we should take it over $e_i \in \text{Out}(W) \setminus \text{In}(W)$. For example, in the first example of W in Ex.5.1, we want to include U_1 , even though its edge is not in $\text{In}(W^c)$.

Similarly, for the second product, we should replace $\text{In}(W) \cap \text{Out}(W^c)$ with $\text{Out}(W^c) \setminus \text{In}(W^c)$.

Acknowledgements. I would like to thank Daren Chen for pointing out these errors.
