

WebOS Platforms and GPLv3/Affero

Todd Davies

(joint work with

Leo Perry and Ben Newman)

OSCamp

July 26, 2007

Questions

- If Facebook becomes the Windows of the Web, do we need a Linux of the Web?
- If so, what would it be?
- How would it be licensed? GPLv3? LGPL(v3?)? Affero? MIT,etc.?

Our project

- Deme: a platform for online deliberation (Groupspace.org)
- Written in Ruby on Rails (ne PHP)
- See <http://deme-rails.groupspace.org>
- Code release awaits licensing decision
