The following provides an outline of the topics that we will cover in the course. There are several textbooks that you may consult for background readings on most of these subjects. They are:

You each should have access to the text by Mas-Colell, Whinston, and Green, (henceforth MWG) by now. That is the only required text. The texts above have very different styles and so if you find MWG a bit challenging at times, you may benefit from consulting one of the other texts, me, or your classmates for enlightenment. MWG provides the most comprehensive treatment of most of the topics that we will cover in this course. In each of the topics below I list the appropriate chapters from each text.

The course has biweekly problem sets and a final exam. Each problem set covers a significant amount of material, and so leaving it until the night before it is due is not a good idea. You may consult with your classmates on the problem sets, but not until you have worked through each problem on your own. Late problem sets are not accepted without prior permission and good reason.
