

Mainframe Database (Keyword: MFDB)

DB2: The DB2 team focuses on the evaluation, integration, and maintenance of DB2 database related technologies. The DB2 Database and Systems Administration team has numerous responsibilities. Read more about the DB2 Services.

ADABAS: The ADABAS DBA team's primary focus is the support of the International Trading System (ITS) application. The ITS application's data is stored in Software AG's ADABAS database management system (DBMS) and the programming language used in almost all of the ITS application programs is Software AG's NATURAL programming language. These two software products form the core of the ADABAS DBA teams support functions but there are numerous other responsibilities which include but are not limited to the following: Installation of upgrades, application of fixes and general support for the following software products (from Software AG unless specified otherwise): Read more about ADABAS Services.

IDMS: MTS supports the trade capture and settlement of US\$ denominated fixed-income products. The core of MTS is an IBM mainframe-based system with transaction processing being managed by CICS and data management by both IDMS and DB2 databases. Products supported by MTS.

 Tran-Borrow-Loan File Reloads

Scheduled 7/14/2007
 Natural upgrade in Development

What's New

DB2 Improvements 01/11/2007
 We have applied the ChangeLimit option to DB2 image copy jobs. Full image copy will only be taken if changes to tablespace or partiton are larger than 0.1%. Incremental copies will be applied to changes less than 0.1%. This change will decrease the usage of DASD and CPU

ZP80 DB2 Maintenance 11/10/2006
 Successfully applied DB2 maintenance (PUT0511) and hipers to ZP80.

How Do I?

ADABAS

- ❑ How do I find the test database ID number that maps to it's production equivalent?
- ❑ How do you debug a Natural NT06 abend in CICS?
- ❑ How do I determine what database a file can be found on?
- ❑ How do I determine when the Production databases will be available over the weekend?
- ❑ How do I determine when the Staging databases will be available daily?
- ❑ How do I determine when the Staging databases will be available over the weekend?
- ❑ How do I request a change to ADABAS File Layout
- ❑ How do I request a transaction definition in ADOP 2.1
