

Global Real Estate Group

Global Real Estate Update

November 6, 2007

LEHMAN BROTHERS

Executive Summary

- ◆ The Global Real Estate Group (GREG) has grown rapidly and profitably over the past few years. At the same time the Real Estate Private Equity (REPE) business has grown into one of the pre-eminent REPE groups in the industry. Together REPE and GREG operate as the only fully integrated Real Estate group in the industry
- ◆ The business is built around over 200 real estate clients; 95% of the balance sheet used by GREG globally is used in facilitating some form of client transaction. The majority of transactions sourced for REPE (particularly in US) are sourced by the franchise
- ◆ GREG currently employs 445 people (inclusive of origination platform): US 256; Europe 102; Asia 87 (REPE 86 people globally)
- ◆ The GREG balance sheet is currently \$58Bn; the regional growth from '06 to '07: US \$19-35Bn, Europe \$6-15Bn and Asia \$4-8.6Bn
- ◆ With the advent of REPE, the balance sheet growth has been in the more debt-oriented parts of the capital structure. Accordingly, to maintain revenues (without significant headcount increases) the balance sheet has necessarily increased and the ROA has and will inevitably continue to decrease over time
- ◆ In 2006, GREG had revenues of \$2.1Bn: pretax margin of 75% and an approximate 7% ROA; estimated '07 revenues of \$1.6Bn
- ◆ The \$44Bn debt balance sheet is over 90% floating rate with approximate WAM of 28 months
- ◆ GREG has no repo or CMBS warehouse lines
- ◆ GREG has always aggressively marked and managed its position. Since 2003, it has taken over \$2.9Bn in write-downs while maintaining strong profitability based on its conservative policies and the cushion of imbedded profitability (albeit smaller today)
- ◆ Notwithstanding strong real estate fundamentals, transactions have slowed to a trickle due to uncertainty around financing, valuation (stalemate) and weakening economic forecasts
- ◆ All other CMBS competitors (except Goldman), have had some form of layoffs ranging from (10-50)
- ◆ GREG believes that under any circumstance an estimated \$15Bn reduction in global balance sheet is warranted
- ◆ 2008 revenue projections presuppose a 1Q08 capital markets recovery, depending on market conditions, the revenue will correspondingly be reduced

Issues to Consider

- ◆ Franchise position: message to clients
- ◆ Headcount?
- ◆ Regional plans
- ◆ Major concentrations and risks (land, condos and Archstone)

Global Balance Sheet & Net Revenues Trend

Net Balance Sheet⁽¹⁾

Net Revenues

2008 Project Revenues:

Budget – Assumed capital markets liquidity returned to normalcy in the 1Q08

Scenario 1 – Assumes capital markets liquidity returns to normalcy in the 1Q08 and balance sheet reduced by \$15Bn through the 2Q08

Scenario 2 – Assumes capital markets remain as is and reduce balance sheet by \$15Bn through the 2Q08

Scenario 3 – Continued deterioration in capital markets and reduce balance sheet by \$15Bn through the 2Q08

* The cost of effectuating the balance sheet reduction results in a \$100MM to \$700MM loss depending upon market conditions

1. Net Balance Sheet excludes gross-ups

2. 2007 Revenue figures are based on an estimated Q4'07 of approx. \$100mm

Asia by Property Type (\$M M)

Real Estate Capital Markets Overview

Americas	Europe	Asia
<ul style="list-style-type: none"> ◆ Fundamentals remain strong in the commercial sector (rent growth, lack of new supply) ◆ Sales activity has slowed dramatically due to capital markets disruption ◆ Stalemate – buyers want discount because of higher borrowing costs; sellers say they will wait until borrowing costs come down if they don't have to sell ◆ The weak \$ and inflows of foreign capital have left cap rates low on class A properties in primary markets ◆ Cap rates for class B properties and property located in secondary markets expected to rise more dramatically ◆ Unlike the residential market, there has been no noticeable increase in delinquencies ◆ Securities markets generally shut, the exception being AAA and below investment grade fixed rate bonds ◆ Syndication market overwhelmed by supply ◆ Spreads on whole loans and securities experienced drastic widening in the last month 	<ul style="list-style-type: none"> ◆ Rental Growth predicted to be less but still present in most major cities ◆ Cap rates are under pressure for non-prime assets – Germany is biggest issue ◆ UK Outlook uncertain, with most sectors exhibiting slow rental growth and falling capital values. Retail investor auctions giving strong mixed messages ◆ U.K. House Prices (Minimal LB Exposure): Northern Rock hurt low / mid-market; £1 – 5m slower; £15m plus strong ◆ Emerging Markets: Capital pullback likely; Russia looks tough ◆ Bank Syndication: Wider pricing but good liquidity; Banks getting overwhelmed by supply ◆ B-Note: Slightly wider pricing but good liquidity; Banks getting overwhelmed by supply ◆ Mezzanine debt has priced wider but good liquidity ◆ Equity: The outlying debt driven bidder is out – pricing changes (especially in Germany) 	<ul style="list-style-type: none"> ◆ Strong fundamentals across the region for all products; office rental rates in major cities (Tokyo, Hong Kong, Shanghai, Singapore) have risen 15-20% per year and continued growth is expected ◆ Cap rates in growth areas continue to tighten (China, India, Singapore); Japan have stabilized, but are expected to slightly widen as debt markets re-price ◆ Development activity continues to be very strong and there is ample liquidity across the region (China/India RE Co's IPO's, REIT activity, PE in-flows) ◆ Stable debt markets across region; local banks active across products; minimal securitization penetration in the region so less volatility from global events ◆ Japan CMBS is stable, high expected supply in near term; total capital structure WAC has widened 5bps from mid-year; whole loan spreads widening by 25bps and de-leveraging; minimal residual CMBS held; priced LJAC-6 Nov 5th ◆ Major risks include government regulatory changes in Japan/China/India around in-flows and controlling RE appreciation; potential Japan deflation

Diversified Product/Region Portfolio

Balance Sheet \$ Contribution by Business Segment / % of Global Balance Sheet – Oct-07⁽¹⁾

1. Excludes Gross-up

GREG US: CMBS Product Exposure

CMBS Securities

Overview

Total: \$1.6bn (3% of Global BS)

- ◆ Improving U/W standards; less pro forma, higher DSCR and lower LTV
- ◆ Supply will decrease dramatically; conduit origination down 70%; large loan origination down 90%.
- ◆ Q4 '07 supply is expected to be \$25bn vs Q4 '06 of \$53bn. Street consensus expects 2008 supply to decline 50-70% year over year.
- ◆ Total return swaps used to hedge AAA exposure.
- ◆ 69% of the position is rated AAA

Fixed Rate CMBS Securities

Total	1,283	2.2%	3.6%		

GREG US: CMBS Product Exposure

Fixed Rate Securizable

Overview

Fixed Rate Securizable: \$1.7bn (3% of Global BS)

- ◆ Fixed rate conduit is the most liquid / active market of the securitization markets.
 - AAA spreads have widened from 25bps in Jan-07 to 75bps in Aug and are currently trading at 65bps
 - BBB spreads have widened from 75bps in Jan-07 to 400bps in Aug and are currently trading at 500
 - Non-rated spreads have widened from 20% in Jan-07 to 27% in Aug and are currently trading at 28%
- ◆ Origination volumes are down an estimated 70%
- ◆ Pricing has widened and leverage points have fallen creating a more attractive risk profile on new originations
- ◆ WA LTV: 69%
- ◆ Key Risk: Spread rather than credit – mitigated by active hedging strategy utilizing TRS, CMBX and swaps

Top 5 Positions – 60% of Category

Position	B/S at Risk (\$mn)	% of Global BS at Risk	% of Regional BS at Risk	Description	Exit
1 Innkeepers	413	0.7%	1.2%	71% LTV acquisition financing for Apollo's purchase of Innkeepers (69 hotels)	Securitization in Nov 2007

Total	1,016	1.7%	2.9%		

Floating Rate Large Loans

Overview

Floating Rate Large Loans Total: \$6.2bn (11% of Global BS)

- ◆ Minimum liquidity in floating rate securitization market due primarily to SIV issues and sec lenders pull back
- ◆ The traditional first mortgage syndicated loan market has lagged the capital markets but is now experiencing tighter liquidity and spread widening
- ◆ Structural and pricing flex have been reintroduced to the market; approx. 35% of the exposure has a full price flex.
- ◆ WA LTV: 59%
- ◆ WA Life based on initial term: 24 months
- ◆ WA Life based on extended full maturity: 40 months
- ◆ WA DM: 275 bps over Libor
- ◆ Key Risk: Spread not credit risk

Floating Rate Mezz / B-Notes

Overview

Senior Total: \$4.7bn (8% of Global BS)

- ◆ Lack of available financing has widened spreads throughout the capital structure
- ◆ Lower leverage mezz widened by 25 ~ 50 bps. Cash buyers (e.g., insurance companies) still active
- ◆ High leverage mezz widened by 100 ~ 200 bps. Opportunistic buyers remain active
- ◆ CDO Buyers drove moderate leverage mezz market which remains the most challenged.
- ◆ About \$1.25 billion in balance sheet reduction expected by 1Q08
- ◆ Approximately one-third of the book has full price flex and/or some form of sponsor guaranty
- ◆ Market disruption caused customers to DK \$500mn of circled trades
- ◆ WA LTV: 73%
- ◆ Weighted average DM is 360 bps over Libor
- ◆ WA Life based on initial term: 23 months
- ◆ WA Life based on extended full maturity: 49 months
- ◆ Key Risk: spread and credit

Top 5 Positions: 41% of Category

Position	B/S at Risk (\$mn)	% of Global BS at Risk	% of Regional BS at Risk	Description	Exit
1 Hilton	672	1.1%	1.9%	LB's 7.5% share of a 78% LTV, \$21bn acquisition financing to Blackstone's purchase of Hilton.	Currently in the market; most junior pieces circled
2 Beacon III	452	0.8%	1.3%	93% LTV financing for Broadway's acquisition of Beacon Fund III. \$322mn of senior bridge mezz and \$142mn junior or bridge mezz. Full price flex plus \$75mn limited sponsor guaranty (with 237 Park)	In final phase of institutional fund raise; expect payoff of junior bridge mezz in 1Q08
3 237 Park	331	0.6%	0.9%	96% LTV acquisition financing for Broadway Partners. Full price flex plus \$75mn limited sponsor guaranty (with Beacon III)	In final phase of institutional fund raise; expect payoff of junior bridge mezz in 1Q08
4 CalWest	323	0.6%	0.9%	84% LTV financing to Walton Street Capital's acquisition of the CalWest industrial portfolio.	Currently being marketed; 66% circled with expected closing of 1Q08

GREG US: CMBS Product Exposure

Term Loans / Revolvers

Overview

Term Loans / Revolver Total: \$4.6bn (8% of Global BS)

- ◆ Liquidity appears to be slowly returning to the market generally, although new issue levels remain below par
- ◆ Real estate related bank loan market largely driven by CDO issuers, most of whom remain sidelined due to lack of financing
- ◆ Significant exposures to Archstone and SunCal
- ◆ Archstone risk mitigated by price flex.
- ◆ Weighted average mark on SunCal exposure is 91.6
- ◆ Key Risk: Credit risk-California land recovery

Top 5 Positions - 75% of Category

Position	B/S at Risk (\$mm)	% of Global BS at Risk	% of Regional BS at Risk	Description	Exit
1 Archstone Term Loan	2,250	3.8%	6.4%	47.3% of BB-rated \$1.75 bn Term Loan A and \$3bn Term Loan B financing the acq of Archstone by Tishman and Lehman. Full price flex. \$5.1bn equity commitment to finance the \$23bn acq of Archstone	Mktg commencing on TLA 11/07. Mktg on Term Loan B to commence 3/08
2 Ritter Ranch	326	0.6%	0.9%	Shr lien & mezz on 10,625 acre parcel in LA County, to be developed into a 7,158 lot master planned community. 97% LTV on liquidation value.	Exploring JV with Farallon to deliver; contemplated to be refinanced in connection with equity recap of SunCal.
3 Wintergames (Intravest)	310	0.5%	0.9%	LB/DB/BS originated a \$1.8bn loan to Fortress Investment Group to purchase Intravest Corporation	\$310mm is target hold
4 Marblehead/Heartland	287	0.5%	0.8%	Term loans on two land development deals: (i) Marblehead - a 313-lot master planned community in Orange County, CA, and (ii) Heartland - a 982-lot master planned community in Riverside County, CA.	Marblehead currently selling lots. These lot sales alone will retire debt
5 SunCal Communities I	263	0.4%	0.7%	First lien & mezz on 7 master planned communities consisting of 15,837 lots. 95% LTV on liquidation value.	To be repaid through asset specific construction loans. May syndicate post 3/08.
Total	3,436	5.9%	9.8%		

Bridge Equity

Overview

Bridge Equity Total: \$3.6bn (6% of Global BS)

- ◆ Institutional capital has not re-priced core and core plus return thresholds; more scrutiny being placed on exit assumptions
- ◆ Investors are focused on current cash returns
 - Transactions with low cash on cash yields are requiring higher return thresholds
 - Investors are focused on the debt stack and the risk of spread widening on equity returns
- ◆ Bridge equity exposure reduced \$550mm (US/Europe) through asset sales and equity sales in the 3Q07
- ◆ Bridge equity book marked conservatively at 92.
- ◆ Key risk: At the money valuation risk (incorporates both spread and credit).
 - Price flex on debt eroding equity returns
 - Recession reduces / eliminates prospects for rental growth
 - Headline risk reduces investor demand for all real estate

Bridge Equity

Overview

Bridge Equity Total: \$915m (2% of Global BS)

- ◆ Institutional investors continue to receive new allocations to property
- ◆ Sponsors' fee and promote structures will be pushed back upon by investors
- ◆ Feedback on existing positions has been positive but process is slow
 - Assets are very prime and unique, help insulate from market declines
- ◆ Key risk: At the money valuation risk (incorporates both spread and credit).
 - Price flex on debt (on certain deals) eroding equity returns
 - Recession reduces / eliminates prospects for rental growth
 - Headline risk reduces investor demand for all real estate

GREG Asia: PTG Product Exposure

NPL

Overview

Total: \$1.7bn (3% of Global BS)

- ◆ Continued strong demand in Japan from domestic and international purchasers; most offerings attract five or more bidders
- ◆ Existing positions are conservatively marked; all collections for Non-Japan NPL reduce basis; no profit taken until portfolio basis is zero
- ◆ In the past 60 days, recent appraisals were received and reviewed for the large Japan NPL collateral (no write downs)
- ◆ US\$50m net mark up in Japan in 2007 (US\$60m in mark ups and US\$10m markdown); mark down due to a corporate bankruptcy, not real estate valuation
- ◆ In Japan over 80% of the borrowers (by purchase price) are making steady payments; most loans will be restructured and securitized or sold as whole loans
- ◆ Over 97% of the loans are variable rate and overall spreads on existing positions are wide relative to LTV (e.g. 70% LTV loans are +350bps or higher)
- ◆ No expected losses if an orderly liquidation (e.g. four months) is required; expected losses for a "fire sale" would be 2% or less of portfolio basis
- ◆ Mark = 90 (Security values do not take into account NPL liquidity discounts)
- ◆ Average portfolio size of \$10.2m, with average investment per borrow less than \$1m
- ◆ Key risk: government intervention to limit re-financing exits (e.g. Japan FSA)

Top Five Positions - 22% of Category

Position	B/S@Risk (\$m)	% of Global BS at Risk	% of Regional BS at Risk	Description	Exit

Total	376	0.6%	4%		

Key Portfolio Risk Factors and Stress Analysis

West Coast Land Review

Portfolio underwritten for recovery in 2009 due to strong macro fundamentals in CA

Economy and Demographics

- ◆ Population is expected to increase by 13 million people by the year 2030, accounting for greater than 15% of total national growth
- ◆ Average annual demand is expected to be 220 thousand units per year and construction has lagged below, averaging just 174 thousand units per year since 1999
- ◆ There is substantial pent-up demand for affordable entry-level new housing across CA

Approach and Portfolio Summary

Portfolio Characteristics:

- ◆ Total basis for deals included is approximately \$2.9Bn (157 deals)
- ◆ The \$2.9Bn consists of \$1.8Bn in 1st liens (mtm=.93), \$332MM in mezz loans (mtm=.71) and \$721MM in equity (mtm=.78)
- ◆ Major sponsors include: Troxler, Capstone and Suncal

Assumptions:

- ◆ Stalled housing market will slow absorption of lot take downs
- ◆ Immediate price declines to remain flat through sellout
- ◆ Current carry costs for deals will remain in place (no refinance)

Methodology:

- ◆ DCF models are used to provide LB with a base case scenario of how each deal is expected to perform through exit and used to determine if the deal is marked appropriately
- ◆ Sensitivity analysis / multiple stress scenarios are run

Realized PTG P&L in CA Land by Year

Year	2003	2004	2005	2006	2007	Total
Realized P&L CA Land	103	92	209	125	52	583

- ◆ Despite the current market slowdown, the CA land business has been and we expect it will continue to be a profitable business line
- ◆ Projected net revenues of the position are estimated at \$793MM

Financial Summary (\$MM)

PTG Balance @ 11/1/07	\$1,852
PTG Basis @ 11/1/07	1,505
Bank Loan Balance @ 11/1/07	\$1,491
Bank Loan Basis @ 11/1/07	1,372
Current Combined Basis	2,877
Potential Combined Mark Downs in Stress Case	(256)
Potential Combined Basis	2,621
Potential Combined Mark	0.78

- ◆ The NPV approach highlighted \$116MM in immediate credit impairment, which was flashed as of October month end
- ◆ Our stress analysis shows an incremental \$256MM in potential losses

Major Exposures / Risks: Condo Development / Conversion

Slower investor demand and tighter mortgage credit continue to challenge the market

Condo Status	Number of Transactions	Current Outstanding Balance			% Sold	% Under Contract	% Unsold
		Legal as of 9/30/07 (\$mm's)	Mark	Basis as of 9/30/07 (\$mm's)			
Properties Less Than 35% Sold	15	737	95.35	703	2%	12%	86%
Properties Between 35% and 75% Sold	29	752	64.63	486	32%	24%	44%
Properties Greater Than 75% Sold	26	761	90.49	688	31%	60%	10%
Condos w/o Sales LB will Develop with operating partner	32	534	84.33	450	0%	0%	100%
Condos without Sales LB will not Develop / Convert	18	785	87.44	686	0%	0%	100%
Totals/WA	120	3,569	84.45	3,014	20%	27%	53%

Portfolio Characteristics

- ◆ The total basis for condo projects in development is approximately \$3Bn across 120 deals (average deal size of \$25.1MM)
- ◆ The \$3Bn consists of \$1.8Bn in 1st liens (mtm=.98), \$761MM in mezz loans (mtm=.89) and \$430MM in equity (mtm=.55).
- ◆ Projected net revenues of the position are estimated at \$759MM; 10% price stress reduces projected net revenues to \$393MM
- ◆ The geographic footprint of the portfolio is as follows: 30% in NY, 20% in FL, and 16% in CA
- ◆ 35% of the book is condo conversion projects which have been negatively affected by the tightening of mortgage credit, coupled with highly leveraged underlying capital structures

Market Risks

- ◆ Lack of investor demand
- ◆ Slowing absorption is stressing capital structures and increasing negative carry
- ◆ Over supply of new product in certain markets will hinder near term recovery
- ◆ Some buyers walking from deposits on new developments

Summary of Largest Positions

- ◆ Carillon (Canyon Ranch) – \$374MM Condo development in North Miami Beach, FL. 87% of project is sold; TCO obtained 11-1-07; Expected payoff of phase 1 in 1Q08
- ◆ 25 Broad St. – \$306MM Condo conversion in downtown New York. 30% reserved since March 07; Borrower has guaranteed \$50MM of loan
- ◆ Greenwich Apartments – \$230MM Condo conversion in Greenwich, CT. LB pursuing foreclosure and simultaneously exploring sale of loan; Strong investor demand for multi-family product should provide liquidity to LB's position

Archstone-Smith Trust

Lehman Brothers, along with its partners, acquired Archstone-Smith Trust, a large multi-family REIT in the fourth quarter of 2007. The Firm reduced its total exposure to \$5.8 billion⁽¹⁾

- ◆ Over 50% of Lehman's exposure to the acquisition was syndicated prior to the completion of the commitment
- ◆ Lehman's original committed exposure was \$11.5 billion, which was comprised of \$9.1 billion of debt¹, \$2.2 billion of bridge equity and \$250 million of permanent equity
- ◆ The Firm has reduced its exposure to \$5.8 billion⁽¹⁾ through the following:
 - Fannie Mae purchased \$7.1 billion of the total debt on 10/5/07
 - Freddie Mac purchased an additional \$1.8 billion of debt on 11/1/07
 - A 90% interest in 16 select Orange County / San Diego properties has been sold, generating net proceeds of \$1.4 billion
 - \$1.4 billion of existing debt and \$370 million of preferred equity was assumed

Lehman Brothers' Share of Archstone-Smith Distribution

1. Includes share of \$750 million revolver commitment.

Spread Widening Risk: Global CMBS Business

For the Commercial Mortgage Backed Securitization (CMBS) business, the Firm utilizes stress scenarios, similar to previous events, to determine the worst-case losses. The scenarios below reflect two of the most severe stress scenarios

Event Stress Scenarios and Impact on CMBS Positions as of September 30, 2007

Spread Widening Assumptions	Scenarios	
	Credit Crunch	Rating / Default & HF Risk
AAA	36bps	12bps
BBB	255bps	80bps
Below Investment Grade	300bps	130bps
Impact of Spread Widening		
US	(74)	(29)
Europe	(142)	(26)
Asia	(36)	(6)
Profit/(Loss)	(252)	(61)

Note: Impact of spread widening is net of unrealized PnL. US and European spread widenings based on regional levels.

- ◆ Credit Crunch: Widening of credit spreads is similar to, but is not limited to, what was seen during July-August 2007. Mortgages decline significantly. Most other markets experience a flight to quality move, EMG credit spreads gap, fx carry trades unwind.
- ◆ Rating/Default and Hedge Fund Risk: Significant rating risk (e.g. GM), one name default in CDX or HVOL coupled with hedge fund blow-out on structured credit products causing panic selling, significant market widening with CDS basis gapping out (modeled after the period Jul 18, 2002 - Aug 2, 2002)

Stress Test: Global PTG Assets/Bridge Equity/Bank Loans

The portfolio is stressed for a significant downward valuation movement similar to 1991-92 and flat 10% decline in property values

Projected Portfolio Profit/(Loss) Scenarios (\$M M) – As of 10/31/07

	P&L Estimate		Stress Scenario					
	Total		10% Decline		Archstone Bridge Equity		Total

Total Global	4,625	1,561	(2,133)	(1,245)	(80)	(384)	(2,213)	(1,629)

(1) Assumes US losses have been offset by \$285MM for Archstone and \$75MM for other US Bridge Equity due to the clawback of Sponsor's asset management fees and promote

- ◆ With a 10% decline in property values, including the embedded value that we already take into account, we foresee a loss in an orderly liquidation of \$1.6Bn
- ◆ With an orderly disposition, we expect to generate a profit of \$1.5Bn
- ◆ The cost basis of the portfolio is currently \$20.7Bn. The expectation is that investments will be made in the underlying assets to increase their values. We expect that these investments will increase the cost basis to \$26.2Bn and will allow the Firm to harvest \$4.6Bn in profits
- ◆ The assets detailed incorporate the majority of the equity and debt investment reported as less liquid assets along with CMBS bridge equity positions
