Between you and me only please. You might need to help push andy along here around the delevering we need to accomplish. He obviously just got the seat and might not want to push that hard but in my opinion we need to push hard in this 3 week window before mer earnings

Ill do my best and you know I'm not shy even though he is my boss. Can you send me a breakout of fid (cash cap usage) so I can push him on the right spots? Or tell me what you need him to do and ill push up from my seat
