

Stanford Workshop on Migration as Adaptation

28-30 April 2011

<http://iriss.stanford.edu/scpr/>

TOPICS:

Population Projection, Stochastic Forecasting and Models of Mortality
Individual and Household Responses to Risk and Uncertainty
Remote Sensing, Climate Change, Water/Food Security, and Health
Agent-Based Models of Land-Use Change and Migration
Livelihoods, Fertility, and Migration on Agricultural Frontiers

In this workshop, we will bring together demographers, anthropologists, economists, and geographers to develop a methodological toolkit for understanding migration as an adaptation to risk. The specific aim of the workshop is to promote knowledge of methods and perspectives from different disciplines, disseminate information about the growing wealth of demographic data on the biophysical environment and human migration, and to foster collaborative and interdisciplinary work. The format will consist of lectures by invited researchers to an audience of other researchers, selected graduate students, and junior faculty.

FACULTY:

James Holland Jones, Stanford University

Shripad Tuljapurkar, Stanford University

Eric Lambin, Stanford University

David Lobell, Stanford University

William H. Durham, Stanford University

Ronald Rindfuss, UNC & East-West Center

Lori Hunter, University of Colorado

David Lopez-Carr, UC Santa Barbara

Amber Wutich, Arizona State University

The workshop is open to graduate students, post-docs, and junior faculty interested in including formal demography in their research. Applications consist of a 250 word research statement, and a Curriculum vitae. Graduate students must include a letter of recommendation from their advisor. State whether you need financial aid (participants pay travel, board, lodging; support is available for ~20 students from US institutions). We cannot accommodate accompanying persons.

Email applications to:

Larry Bond,
