

## Experiment 1.

Without dwelling on it unduly, reflecting on your answers, or trying to be clever or original, list the first 20 parts of the body (the human body) that come to your mind. Write them down in the order they come to you. If you run out of steam, stop and mark the end of your list with an asterisk (\*).

Send your ordered list to me at [arnold.zwicky@gmail.com](mailto:arnold.zwicky@gmail.com), along with the tag “Experiment 1” and your age and sex. I’ll assign your reply a number, and any reports on the experiment will use aggregate data or these numbers.
